

# Lorenzo Vezzano

## Full Stack Developer - UX Specialist

 available

### Work Experience

 **AMA Srl - Software & Application Development**  
2019 - 2022

I worked at AMA Srl, a Vicenza-based company that operates internationally. AMA develops advanced technological systems (from electronics to software and applications) in the industrial trucking world, offering complete solutions for monitoring and controlling the fleet. I worked in the development department, working closely with a team of Full Stack Developers.

The main tasks I was responsible for within the company were:

**Mobile Application Development**  
Development of the AMA Fleet Manager mobile app with **React Native** framework that allows the use of the same code for different mobile platforms (cross-platform). I designed the entire development of the application, the UI and the back end programming (Redux). For the version control of the project I used the **Git** software system.

**Web & Software Development**  
Webpages development and tools implementation in the company's website. **JavaScript**, jQuery, Bootstrap, C#, ASP.NET, HTML, SCSS are some of the tools I used.

**Database organization and management**  
Interfacing with the company's internal **Microsoft SQL Server** database was something I did on a daily basis. SSMS allowed me the creation of new data structures, Stored Procedures, Queries, processing tasks and data transmission.

 **Personal Projects - Mobile & Web Development**

On a personal level I have developed several applications, including: two Web Apps, a Hybrid App with **React Native**, my own Website with the help of Bootstrap, a CRUD Web Application developed in **PHP**, several JavaScript tools.

### Skills

- UX
- UI
- App Dev.
- Web Dev.
- Graphic Design
- React Native
- JS
- Node.js
- SQL
- PHP
- C#
- HTML
- CSS
- Git
- MS Office
- Adobe CC

### + About me

Accuracy and attention to detail are the founding values with which I approach my daily work. I am a dynamic person capable of proactively relating to colleagues and working as part of a team.

I possess excellent organizational and communication skills, developed both at work and in external projects and adventures. In 2022, I planned, organized, and embarked on a four-month solo trip around Europe, refining my English language knowledge and problem solving skills.

I'm a creative and original person, flexible and with the ability to adapt.
