

# Lorenzo Vezzano

Full Stack Developer - UX Specialist

 available

## Work Experience

**Cybrain Srl - Full Stack Developer**

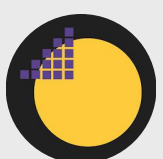

2022 - Current | Vicenza, Italia

I worked at Cybrain Srl, a company specializing in cybersecurity and software development, as part of the development team in a **full-stack role with a focus on front-end development**.

I played a central role in the web solutions developed for clients, starting with the design of the application interface (definition of wireframes and flows), applying **UI** and **UX** principles, through to the **complete implementation of the front-end**, in particular for dashboards and interactive web applications for national clients.

During this experience, I was entrusted with the **technical responsibility for several projects**, coordinating other team resources in the revamping of existing solutions and the development of the company website.

Working in a context that combines software development and cybersecurity has allowed me to develop skills in **secure software development**, applying security best practices during the design and development phases.

**AMA Srl - Web & Mobile Developer**

2019 - 2022 | Vicenza, Italia

I worked as a developer at AMA Srl, contributing to the development of web and mobile solutions for fleet and goods monitoring and control. In particular, I independently designed and developed the “AMA Fleet Manager” app with React Native, overseeing the entire interface design (UI/UX) and front-end development.

## Personal Projects

I have developed several applications, including the “Carafe” app, web apps, my showcase website, and various tools in JavaScript.

## + About me

Accuracy and attention to detail are the founding values with which I approach my daily work. I am a dynamic person capable of proactively relating to colleagues and working as part of a team.

I possess excellent organizational and communication skills, developed both at work and in external projects and adventures. In 2022, I planned, organized, and embarked on a four-month solo trip around Europe, refining my English language knowledge and problem solving skills.

I’m a creative and original person, flexible and with the ability to adapt.
